AUTHOR INDEX

Alarie, Y.
Toxicity of Thermal Composition Products: An Attempt to Correlate Results Obtained in Small Scale with Large Scale Tests, p. 58.

Allen-Rowlands, Catherine
Development In Vitro Biological Methods for Determination of Smoke Toxicity, p. 173

Anderson, R.C.
Toxicity of Thermal Composition Products: An Attempt to Correlate Results Obtained in Small Scale with Large Scale Tests, p. 58

Cagliostro, D.E.
Modeling Hydrogen-Cyanide Absorption in Fires, p. 161

Damant, Gordon H.
Results of Some Toxicity Studies, p. 77

Delcroix, J.P.
A New Test Chamber for the Toxicological Study of Combustion of Pyrolysis Products, p. 3

Fouet, C.
Experimental Intoxications by PVC Thermal Degradation Products: Study of the Respiratory Tract Lesions, p. 108

Gaume, J.G.
Initial Tests of the Combined ECG/Ti Animal Systems Using Carbon Monoxide Exposure, p. 125

Greenberg, Leo
The Acute Inhalation Toxicity in Rats from Pyrolysis Products of Polymeric Materials, p. 45.

Guerbert, M.
A New Test Chamber for the Toxicological Study of Combustion or Pyrolysis Products, p. 3

Hayduk, L.W.
Toxicity of Thermal Composition Products: An Attempt to Correlate Results Obtained in Small Scale with Large Scale Tests, p. 58

Herpol, Claire
Note on the Non-Existence of Correlation Between Toxicity and Other Reaction to Fire Characteristics of Materials, p. 135

Hilado, Carlos J.
Comparison of Time to Death, Survival Time, and LT_{50}, p. 33

Toxicity of Off-Gases from Some Common Materials, p. 52

Reproducibility of Polycarbonate Reference Material in Toxicity Evaluation, p. 69

Comparison of Survival Times Under Rising and Fixed Temperature Conditions, p. 96

Toxicity of Off-Gases from Some Common Materials, Part 2, p. 157

Effect of Species on Relative Toxicity of Off-Gases, p. 179

AUTHOR INDEX

Toxicity of Thermal Composition Products: An Attempt to Correlate Results Obtained in Small Scale with Large Scale Tests, p. 58

Herpol, Claire
Note on the Non-Existence of Correlation Between Toxicity and Other Reaction to Fire Characteristics of Materials, p. 135

Hilado, Carlos J.
Comparison of Time to Death, Survival Time, and LT_{50}, p. 33

Toxicity of Off-Gases from Some Common Materials, p. 52

Reproducibility of Polycarbonate Reference Material in Toxicity Evaluation, p. 69

Comparison of Survival Times Under Rising and Fixed Temperature Conditions, p. 96

Toxicity of Off-Gases from Some Common Materials, Part 2, p. 157

Effect of Species on Relative Toxicity of Off-Gases, p. 179

Toxicity of Off-Gases from Some Common Materials, Part 3, p. 182

An Empirical Relationship Between Polymer Structure and Relative Toxicity of Off-Gases, p. 199

Hoschke, B.N.
Toxic Gas Emission from Materials Subjected to Flame, p. 19

Huttlinger, Patricia A.
Comparison of Time to Death, Survival Time, and LT_{50}, p. 33

Toxicity of Off-Gases from Some Common Materials, p. 52

Reproducibility of Polycarbonate Reference Material in Toxicity Evaluation, p. 69

Comparison of Survival Times Under Rising and Fixed Temperature Conditions, p. 96

Toxicity of Off-Gases from Some Common Materials. Part 2, p. 157

Effect of Species on Relative Toxicity of Off-Gases, p. 179

Toxicity of Off-Gases from Some Common Materials. Part 3, p. 182

An Empirical Relationship Between Polymer Structure and Relative Toxicity of Off-Gases, p. 199

Islas A.
Modeling Hydrogen-Cyanide Absorption in Fires, p. 161

Jouany, J.M.
A New Test Chamber for the Toxicological Study of Combustion of Pyrolysis Products, p. 3.

Experimental Intoxications by PVC Thermal Degradation Products: Study of the Respiratory Tract Lesions, p. 108

Keller, L.W.
Toxicity of Thermal Composition Products/ An Attempt to Correlate Results Obtained in Small Scale with Large Scale Tests, p. 58

Loke, Joseph
Smoke Exposure Chamber and Bronchoalveolar lavage as a Method for the Evaluation of Toxicity of Pyrolysis and Combustion Products in Laboratory Animals, p. 37

Lee, George, H. II
Development of In Vitro Biological Methods for Determination of Smoke Toxicity, p. 173

Madden, J.J.
Toxic Gas Emission from Materials Subjected to Flame, p. 19

Maeda, Hiroshi
Exposure of Firefighters to Carbon Monoxide, p. 89

Meltz, Martin L.
Development of In Vitro Biological Methods for Determination of Smoke Toxicity, p. 173

Mikami, Joanne
Results of Some Toxicity Studies, p. 77

Milne, J.W.
Toxic Gas Emission from Materials Subjected to Flame, p. 19

Morikawa, Tokio
Carbon Monoxide, Oxygen Concentrations and Temperature in Compartment Model Fires, and Comparison of Lethal Factors CO, Oxygen Deficiency and Heat, p. 145

Mulcahy, F.R.
Toxic Gas Emission from Materials Subjected to Flame, p. 19

Noyola, Arnaldo J.
Development of In Vitro Biological Methods for Determination of Smoke Toxicity, p. 173

Nogues, C.
Experimental Intoxications by PVC Thermal Degradation Products: Study of the Respiratory Tract Lesions, p. 108

Park, R.E.
Toxicity of Thermal Composition Products: An Attempt to Correlate Results Obtained in Small Scale with Large Scale Tests, p. 58

Paul, Elaine
Smoke Exposure Chamber and Bronchoalveolar Lavage as a Method for the Evaluation of Toxicity of Pyrolysis and Combustion Products in Laboratory Animals, p. 37

Picart, P.E.
A New Test Chamber for the Toxicological Study of Combustion or Pyrolysis Products, p. 3

Presles, J.M.
A New Test Chamber for the Toxicological Study of Combustion of Pyrolysis Products, p. 3.

Raje, Ravindra R.
The Acute Inahalation Toxicity in Rats from Pyrolysis Products of Polymeric Materials, p. 45

Reibold, R.C.
Initial Tests of the Combined ECG/Ti Animal Systems Using Carbon Monoxide Exposure, p. 125

Sciarra, John J.
The Acute Inhalation Toxicity in Rats from Pyrolysis Products of Polymer Materials, p. 45

Spieth, H.H.
Initial Tests of the Combined ECG/T Animal Systems Using Carbon Monoxide Exposure, p. 125

Stock, M.F.
Toxicity of Thermal Composition Products: An Attempt to Correlate Results Obtained in Small Scale with Large Scale Tests, p. 58

Takano, Takehito
Exposure of Firefighters to Carbon Monoxide, p. 89

Tsuchiya, Yoshio
Dynamic Toxicity Factor — Evaluating Fire Gas Toxicity, p. 187

Vandevelde, P.
Note on the Non-Existence of Correlation Between Toxicity and Other Reaction to Fire Characteristics of Materials, p. 135

Virgulto, James
Smoke Exposure Chamber and Bronchoalveolar Lavage as a Method for the Evaluatiosn of Toxicity of Pyrolysis and Combustion Products in Laboratory Animals, p. 37

Williams, Sharon S.
Results of Some Toxicity Studies, p. 77

SUBJECT INDEX

Absorption, p. 161
Acute inhalation toxicity, p. 45
Age of sample, effect on toxicity, p. 77
Analytical approach, p. 187
Animal response, toxicity, p. 77, p. 179
Aviation flame retardant standards, p. 233
Beverly Hills Supper Club Fire, p. 205
Bronchoalveolar Lavage, p. 37
Carbon monoxide, p. 89
Combustion, p. 3, p. 187
Combustion products, p. 161, p. 173
Compartment model fires, lethal comparisons, p. 145
Correlation, toxicity indexes, p. 135
Cotton fabric, p. 77
Firefighter, p. 89
Fire retardants, effect on toxicity, p. 77
Fires, p. 161
Flame retardants-halogenated, p. 58
Gas analysis, p. 187
Gas emissions, textiles, p. 19
Hydrogen cyanide, p. 161
Inhalation, p. 161
In vitro assay, p. 173
Mammalian cell, p. 173
Model, p. 161
Mutagenic activity, in chemicals, p. 260
Mutagens, in combustion products, p. 260
New York Telephone fire, p. 205
Occupational exposure, p. 89
Phenlic foam, toxicity, p. 121
Polyester batting, p. 77
Polyester fiberglass reinforced, p. 58
Polyphosphazene foams, flammability, p. 242
Polyurethane foams, p. 77
Polyurethane foams, flammability, p. 242
PVC wire insulation, decomposition, p. 205
PVC degradation products, p. 108
PVC pyrolysis, p. 108
Pyrolysis, p. 3
Pyrolysis products of polymeric materials, p. 45
Ames *Salmonella* Assay, to detect Mutagens, p. 260
Screening test, carcinogens, p. 260
Smoke & fire, exposure of firefighters, p. 89
Smoke exposure chamber, p. 37
Smoke toxicology evaluation, p. 37
Test chamber, p. 3
Textiles, gas emissions, p. 19
Thermal decomposition, p. 58
Toxicity, p. 77, p. 173
Toxic gases, p. 3
Toxicity, common materials, p. 52, p. 157, p. 182
Toxicity, evolution, p. 69
Toxicity, polycarbonate reference, p. 69
Toxicity, polymer off-gases, p. 199
Toxicities, relative, p. 33
Toxic threat assessment, p. 125
Survival time, p. 96
UL Room Test, p. 58
Wool upholstery fires, p 233
Zirpro flame retardants, p. 233
